# RFID PORTAL

## MODULAR READER SYSTEM

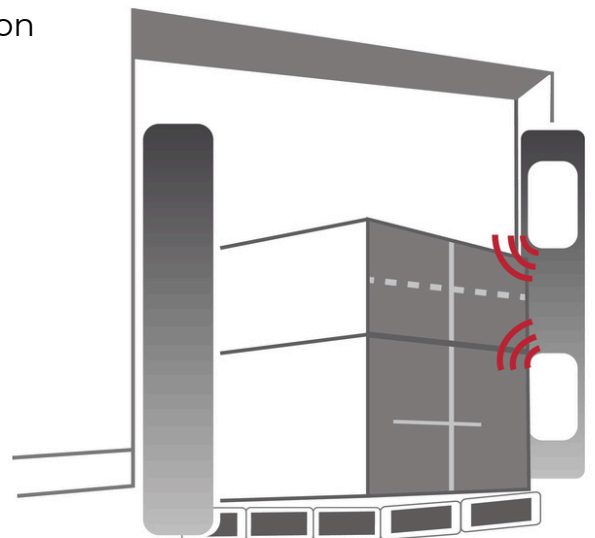

RFID-enabled portal system to enable automated reading of products or assets for enterprise applications. RFID portal system provides components to quickly establish RFID read zones at your site, including a powerful RFID fixed reader, high-performance UHF antennas, integrated electronics module, optional sensors, light stack and/or alarm systems, all consolidated in a single & durable housing (portal).

### Features & Benefits :

- Small footprint (flexible)
- One side or two-side portals (scalable)
- Aluminum or acrylic construction (custom)
- Powered with UHF integrated readers & antennas (adjustable)
- Wide read-distance up to 10 meters with twin portal (lab tested)
- Integrated electronics module for wiring, connectors & cabling
- Motion sensors, Light stack, Alarm & buzzer (optional)
- Power over Ethernet or Wi-Fi communication
- RFID middleware & application (custom)
- Power supply (standard)

### Idea For:

- Warehouse automation
